

Capture The Flag

Goal: Allow administrators to manage students and announcements.

School Request

"The list shouldn't just sit there."

Flag 1 — Prepare Your Mission

Objective: Create a new branch for today's challenge named `feature/event-binding`

Screenshot:

- The command used to create and switch to the new branch.

Flag 2 — Arm the Student Cards

Objective: Add action buttons to every Student Card.

Each student card should now contain three buttons:

- Favorite
- Edit
- Delete

Do not make them functional yet.

Screenshot:

- Student cards showing the three new buttons.

Flag 3 — Arm the Announcement Cards

Objective: Add action buttons to every Announcement Card.

Each announcement card should now contain:

- Pin
- Delete

Again, only add the buttons for now.

Screenshot:

- Announcement cards with both buttons visible.

Flag 4 — Wake Up the Buttons

Objective: Make your first button interactive using Angular event binding.

Choose one button (such as Favorite) and make it respond when clicked. (No logic yet)

Hint: Use Angular's (`click`) event binding.

Screenshot:

- The console or browser showing the button successfully triggered an action.
- Code for event binding

Flag 6 — Crown a Star Student

Objective: Toggle a student's Favorite status.

Clicking Favorite should switch between two states.

Ideas:

- Empty star → Filled star
- Gray button → Yellow button
- Normal card → Highlighted card

Screenshot:

- One student before favoriting.
- The same student after favoriting.
- Code for states

Flag 7 — Control the Announcements

Objective: Make Announcement buttons functional.

Complete both actions:

- Pin should toggle the announcement's important status.
- Delete should remove the announcement from the list.

Screenshot:

- One announcement pinned.
- One announcement deleted.
- Code for logic

Flag 8 — Trigger Edit Mode

Objective: Prepare for future editing.

Clicking the Edit button should display which student is being edited.

Examples:

- Browser alert
- Console message
- On-screen text

Example output:

Editing Juan Dela Cruz

(No logic yet)

Screenshot:

- The edit action successfully displaying the selected student's name.
- Code for edit mode

Flag 9 — The Interactive UI

Objective: Your Student Portal should now respond to user actions without refreshing the page.

Checklist:

- Student cards have Favorite, Edit, and Delete buttons.
- Announcement cards have Pin and Delete buttons.
- Favorite toggles correctly.
- Students can be deleted.
- Announcements can be pinned.
- Announcements can be deleted.
- Edit identifies the selected student.

Screenshot:

- Your completed interactive Student Portal showing both Student Cards and Announcement Cards with working interactions.

Flag 10 — Commit Your Progress

Final Flag Screenshot

- The entire completed browser UI for this activity
- Successful push to `feature/event-binding`
